# The APEX™ 2100 Controller

The APEX™ 2100 Controller is a fully integrated and synchronized system for controlling mechanical oscillation, torch height control (AVC) and wire and gas delivery. With the weld data delivered between the control and pendant instantly. the operator has immediate access to monitor, adjust and control weld parameters throughout the welding process. Simple menus for operation and intuitive controls allow the user to easily operate the system and produce consistent welds for a wide range of applications. The controller is designed to be quickly serviced in a production environment and to withstand harsh environmental factors.

### **FEATURES**

#### Synchronized System

- Captures all welding data in real-time accuracy.
- Operator has immediate access to monitor, adjust and control welding parameters throughout the welding process.
- Up to 90 welding programs can be stored on the controller or a USB for effortless operator selection and set up.
- All weld information and data is stored and can be used for future analytical and statistical reporting.
- USB port for quick transfer of data and information from system-to-system or system-to-PC.
- Ergonomic Pendant is lightweight and balanced for one-handed operation, with large buttons and controls for easy operation while wearing protective gloves.
- Durability Designed to withstand operator and environmental abuse.

- Integration Capability Analog control system provides easy integration with existing fleet of equipment.
- Service and Maintenance If necessary, operators can access and replace PC boards quickly and easily while in the field.

## Easy to Operate

- Simple and logical navigation is easy for operators to learn.
- Illuminated display with clear type for trouble-free reading.

#### **APPLICATIONS**

- Nuclear Energy
- Thermal Energy
- Petroleum Processing
- Pressure Vessel
- Contractors

### **KEY CONTROLS**

- **Emergency Stop**
- 2. LCD Screen
- Selection Keys LCD screen navigation 3.
- 4. Adjustment Knob
- 5. Wire On/Off
- 6. Travel Forward/Reverse – Track Ring travel position
- 7. Stop/Start
- System Set up/Program Screen
- Wire Feed Speed
- 10. Mechanical Oscillation
- 11. Arc Voltage
- 12. Welding Amperage
- 13. Weld Screen Basic weld screen parameters

Part Number	Description				
K52082-1	Orbital Standard System One-Pak® (APEX™ Orbital Controller System and HELIX™ T55 [HELIX™ track ring not included - select track ring size to complete system])				
K52003-1	APEX™ Orbital Controller System (Control, Pendant, Cabinet, Power Wave® S500, Cool Arc® 55 and cables. Weld head not included.)				
K52073-1	APEX™ 2100 Controller				
K52074-1	APEX™ 2100 Pendant				
K52075-1	APEX™ Cabinet				
K52076-25	APEX™ 2100 Pendant Cable, 25 ft (7.6 m)				
K52076-50	APEX™ 2100 Pendant Cable, 50 ft (15.2 m)				
K52076-75	APEX™ 2100 Pendant Cable, 75 ft (23 m)				
K52076-100	APEX™ 2100 Pendant Cable, 100 ft (30.5 m)				
K3170-1	Power Wave® S500				
K3086-1	Cool Arc® 55

## CUSTOMER ASSISTANCE POLICY

The business of The Lincoln Electric Company is manufacturing and selling high qualify equipment. Our consumbles, and cutting equipment. Our challenge is to meet the needs of our customers and to exceed their expectations. On occasion, purchasers may ask Lincoln Electric for information or advice about their use of our products. Our employees respond to inquiries to the best of their ability based on information provided to them by the customers and the knowledge they may have concerning the application. Our employees, however, are not in a position to verify the information provided or to evaluate the engineering requirements for the particular weldment. Accordingly, Lincoln Electric does not warrant or guarantee or assume any liability with respect to such information or advice does not create, expand, or after any warranty on our products. Any express or implied warranty that might arise from the information or advice, including any implied warranty of merchantability or any warranty of fitness for any customers' particular purpose is specifically disclaimed.

Lincoln Electric is a responsive manufacturer, but the selection and use of specific products sold by Lincoln Electric is solely within the control of, and remains the sole responsibility of the customer. Many variables beyond the control of Lincoln Electric affect the results obtained in applying these types of fabrication methods and service requirements.
