

## A CUT ABOVE THE REST

### Outside clamping tube and fittings facing machine type SE 65

The SE 65 is specially designed for squaring in position from 9,52 mm ID to 63,5 mm OD.

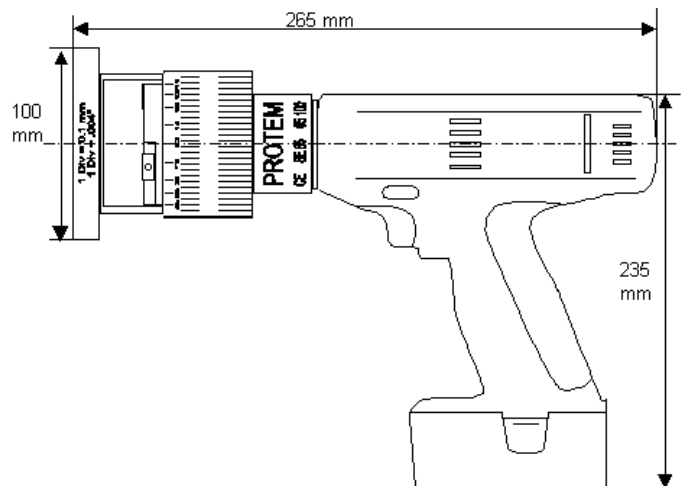

The tool holder plate equipped with 2 tool inserts allows to cover the machining range without any adjustment.

The set up of the tube is carried out quickly through a monobloc collet.

The machine features a graduated vernier which gives a high quality and accurate weld prep.
